

PROJECT LOCATION

Perry County,
Illinois

PROJECT SIZE

275 megawatts
(MWdc)/200 MWac

TRANSMISSION LOCATION

Commodore-Jordan 345 kV

ESTIMATED CAPITAL INVESTMENT

\$288 Million

PROJECT LIFE

35 years from
date of commercial
operation

Arevon, a leading renewable energy company, is developing a utility-scale solar project in Perry County, Illinois.

Local landowners have agreed to lease land sufficient to host 275 megawatts (MWdc)/200 MWac of solar panels, enough to power more than 37,000 Illinois homes each year. The Panther Solar Project offers landowners a way to diversify their land's revenue base and preserve its ability to return to agricultural uses at the conclusion of the project. The Panther Solar Project will also bring benefits to the local community.

The success of Panther Solar Project relies on developing a project that can successfully balance economic, technical, regulatory, and community goals. We look forward to working together to achieve this balance and building a solar project in Perry County will be proud to host.

EXPERIENCED DEVELOPER

Arevon is a U.S. energy leader committed to powering America with affordable, reliable, and secure homegrown energy. Headquartered in Scottsdale, Arizona, and with a regional office in New York City, the company's experienced and dedicated team develops, finances, builds, owns, and operates renewable energy projects nationwide. With a strong track record in utility-scale solar and energy storage, Arevon is a trusted partner to utilities and businesses seeking cost-effective, sustainable energy solutions. By prioritizing American manufacturing and domestic energy production, the company invests in U.S. jobs, strengthens local economies, and advances the country's energy independence.
